It's the end of the world as we know it... Someday soon, you might wake up to the call to prayer from a muezzin. Europeans already are. And liberals will still tell you that "diversity is our strength"--while Talibanic enforcers cruise Greenwich Village burning books and barber shops, the Supreme Court decides sharia law doesn't violate the "separation of church and state," and the Hollywood Left decides to give up on gay rights in favor of the much safer charms of polygamy. If you think this can't happen, you haven't been paying attention, as the hilarious, provocative, and brilliant Mark Steyn--the most popular conservative columnist in the English-speaking world--shows to devastating effect. The future, as Steyn shows, belongs to the fecund and the confident. And the Islamists are both, while the West is looking ever more like the ruins of a civilization. But America can survive, prosper, and defend its freedom only if it continues to believe in itself, in the sturdier virtues of self-reliance (not government), in the centrality of family, and in the conviction that our country really is the world's last best hope. Arguing that the anti-Americanism of Europe may force America to stand alone in the world against global terrorism and other threats, the author paints a chilling portrait of a nation surrounded by enemies and less-than-loyal allies.

Shows how changes in work, family structure, women's roles, and other factors have caused people to become increasingly disconnected from family, friends, neighbors, and democratic structures--and how they may reconnect.

An insightful examination of the changing relationship between Asia and the United States In this lucidly written and thought-provoking book, author Simon Tay highlights the accelerating trends that point to Asia increasingly forging its own path, independent of the United States. He also describes the fundamental changes and new policy directions needed to maintain and strengthen the bonds between Asia and the United States that have been beneficial to both since the end of the Second World War. On the eve of the global financial crisis of 2008, the economies of the United States and its Asian partners were deeply interdependent. But the different approaches taken to the crisis by Asian and Western leaders point to a new separation that may have negative consequences for the economies and businesses of both

regions. To avoid a dangerous divide that may make us all the poorer, Tay reveals what leaders, policy-makers, companies, and citizens can do to find a balance that enriches us all. What was really going on around the president, as the government failed to contain the

coronavirus and over half a million Americans perished? Who was influencing Trump after he refused to concede an election he had clearly lost and spread lies about election fraud? To answer these questions, Phil Rucker and Carol Leonnig reveal a dysfunctional and bumbling presidency's inner workings in unprecedented, stunning detail. Focused on Trump and the key players around him—the doctors, generals, senior advisers, and Trump family members—Rucker and Leonnig provide a forensic account of the most devastating year in a presidency like no other. Their sources were in the room as time and time again Trump put his personal gain ahead of the good of the country. These witnesses to history tell the story of him longing to deploy the military to the streets of American cities to crush the protest movement in the wake of the killing of George Floyd, all to bolster his image of strength ahead of the election. These sources saw firsthand his refusal to take the threat of the coronavirus seriously—even to the point of allowing himself and those around him to be infected. This is a story of a nation sabotaged—economically, medically, and politically—by its own leader, culminating with a groundbreaking, minute-by-minute account of exactly what went on in the Capitol building on January 6, as Trump's supporters so easily breached the most sacred halls of American democracy, and how the president reacted. With unparalleled access, Rucker and Leonnig
