Annotation: The Index is published in two physical volumes and sold as a set for \$250.00. As America's geography and societal demands expanded, the topics in The Etude magazine (first published in 1883) took on such important issues as women in music; immigration; transportation; Native American and African American composers and their music; World War I and II; public schools; new technologies (sound recordings, radio, and television); and modern music (jazz, gospel, blues, early 20th century composers) in addition to regular book reviews, teaching advice, interviews, biographies, and advertisements. Though a valued source particularly for private music teachers, with the de-emphasis on the professional elite and the decline in salon music, the magazine ceased publication in 1957. This Index to the articles in The Etude serves as a companion to E. Douglas Bomberger's 2004 publication on the music in The Etude. Published a little over fifty years after the final issue reached the public, this Index chronicles vocal and instrumental technique, composer biographies, position openings, department store orchestras, the design of a successful music studio, how to play an accordion, recital programs in music schools, and much more. The Index is a valuable tool for research, particularly in the music culture of

Dedicated to giving voice to the benumbed foot-soldiers of the information age it contains blistering first-hand accounts of life at the bottom of the ladder in big banks, defense contractors, computer manufacturers and food processing factories. In these pages the service economy and the new high tech jobs often touted in glowing terms by the mainstream media are exposed for their quotidian banality, their essential uselessness, and the catch-22 absurdity that permeates all corporate life under late capitalism. Moving at bike messenger speed between offices, *Bad Attitude* describes the hazards of the office computer and how to sabotage it, mutant culture in Silicon Valley, the new transiency undercutting links at work, the connections between time and money, bosses and secretaries, resistance and resignation. It provides a unique basis for new theoretical developments in the struggle for human liberation, and, above all, it assures the thousands of isolated rebels mired in dead-end and deadening jobs that they are not alone. The spark of revolt can and must be nurtured until the next wave comes along.
