Thermodynamics: An Engineering Approach: Cengel, Yunus ...

$V[m^3]$ is a function of $t[s]$, $D[m]$, and $V[m/s]$ It is obvious that the only way to end up with the unit m^3 for volume is to multiply the quantities t and V with the square of D . Therefore, the desired relation is $V = C D^2 V t$ where the constant of proportionality is obtained for a round hose, namely, $C = \pi/4$ so that $V = (\pi/4) D^2 V t$.
