Designed for chair assistants, dental x-ray technicians and dental hygienists, this guide provides reference material for the individual dental technicians.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it’s practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science – PM is the ultimate guide to our high-tech lifestyle.

The director of Princeton University’s Outdoor Action Program offers a comprehensive guide to skills, equipment, and trip planning for backpackers of all levels, in a revised handbook that includes the latest information on GPS technology, ultra-light hiking equipment, first aid, trip planning, resources for professional outdoor leaders, and more. Original. 25,000 first printing.

When it was first published in 1998, The Backpacker’s Field Manual set the standard for comprehensive backpacking books. Now exhaustively updated to offer a more complete view of backpacking today, it covers the latest developments in gear—such as Global Positioning Systems and ultralight hiking equipment—first aid, and Leave No Trace comping, and includes a chapter devoted to outdoor leadership resources and basics. Beginners and experienced hikers alike will find this book indispensable for trip planning strategies and also as a quick reference on the trail for: BACKCOUNTRY SKILLS—how to forecast the weather, identify trees, bear-proof your campsite, wrap an injured ankle, and more—illustrated with more than 100 line drawings. TRICKS OF THE TRAIL—time-tested practical lessons learned along the way GOING ULTRALIGHT—downsizing suggestions for those who want to lighten up Every traveler knows that space in a backpack is limited, so on your next trip, carry the only guide you’ll ever need—this one—and take to the great outdoors with confidence.

Paul Bray has spent over twenty summers paddling the rivers, lakes and streams of Ontario’s premier Provincial Park. In this collection of his recollections, he gives us a few pointers regarding the dos and don’ts of backcountry canoe tripping. Many of them learned the hard way. Also a few personal insights and some interesting facts pertaining to the flora and fauna of Algonquin Park.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Do you assume the products you buy, the food you eat, the medicines you take, and the cars you drive are safe? Think again. We’re exposed on a daily basis to life-threatening hazards of which we’re often unaware. From defective airbags that can explode and kill us to poisonous additives in food, we’re often the unknowing victims of corporate malfeasance and shamefully incompetent government oversight. In this hard-hitting expose?, Dr. Gerald M. Goldhaber examines the outcomes when corporate profits trump public safety. He uncovers the dismal history of government regulatory agencies that are supposed to protect us, but instead appoint leaders who come and go from the same industries they’re tasked to regulate. And while our modern conveniences make life easier and more enjoyable than previous generations, we also face new dangers of the digital age. The hacking of autonomous cars, misuse of private information collected by smart devices, and renegade programming glitches in smart homes and offices are just a few scenarios confronting us in the near future. The companies who produce these innovations need to ensure they’re fail-safe, or face hefty lawsuits if and when things go wrong. Principled disclosure of hidden hazards is an industry - and regulatory - necessity. We can only make informed choices and avoid needless injury and death when we know all the facts. Dr. Goldhaber recommends twelve steps to take control of our safety, and outlines a model of corporate responsibility and government regulation that balances public safety measures and company profits to the benefit of all.
