David Griffiths: Introduction to Electrodynamics. Unfortunately, due to a DMCA (copyright) complaint from the publisher of Griffiths's textbook Introduction to Electrodynamics, I must remove my solutions to the problems. Although my solutions were actually my own work and were not copied from any published source, they probably do duplicate to some extent the solutions in the solutions manual ...

~~Griffiths: Introduction to Electrodynamics~~

There's a third edition (this is the second) - I don't know what's changed. Everything you ever wanted to know about vector calculus is probably in here, too, neatly summarised on the insides of the cover and the facing pages, which is very handy.

~~Classical Electrodynamics by John David Jackson~~

In this second edition, Mayer includes double the number of experimental comparisons, 6 new principles - signalling, segmenting, pertaining, personalization, voice and image principles. The 12 principles of multimedia instructional design have been reorganized into three sections - reducing extraneous processing, managing essential processing ...

~~Multimedia Learning—Cambridge Core~~

From the reviews of the First Edition. "An interesting, useful, and well-written book on logistic regression models . . . Hosmer and Lemeshow have used very little mathematics, have presented difficult concepts heuristically and through illustrative examples, and have included references."
