International Financial Management provides students with a foundation for analysis through a text that is well-organized, comprehensive, and provides up-to-date coverage of the topics. Like the first eight editions, it is written based on two tenets: emphasis on the basics and emphasis on a managerial perspective. The scope and content of international finance have been fast evolving due to cycles of deregulations and regulations of financial markets, product innovations, and technological advancements. As capital markets of the world are becoming more integrated, a solid understanding of international finance has become essential for astute corporate decision making. Reflecting the growing importance of international finance as a discipline, we have seen a sharp increase in the demand for experts in the area in both the corporate and academic worlds. International Financial Management discussion is written so that a self-contained treatment of each subject is presented in a user-friendly fashion. The text is intended for use at both the advanced undergraduate and MBA levels.

The overriding objective of Eun and Resnick's International Financial Management, 3e is to teach students how to be effective global financial managers. The text covers the fundamentals of the macroeconomic environment of international financial management, discusses the financial environment in which the multinational firm and its managers must function, and covers foreign exchange management and financial management in a multinational firm.

International Financial Management is written based on two distinct parts: emphasis on the basics and emphasis on a managerial perspective. The emphasis on the basics will allow students to be left with a framework for analysis that will serve them well when they need to apply this material in their careers in the years ahead. The Fifth Edition never loses sight of the presentation that is teaching students how to make managerial decisions. The new edition is founded in the belief that the fundamental job of the financial manager is to maximize share-holder wealth. This belief permeates the decision-making process that is presented from cover to cover. International Financial Management has been completely updated with the most current data tables and statistics in the field today.

The book provides detailed descriptions, including more than 550 mathematical formulas, for more than 150 trading strategies across a host of asset classes and trading styles. These include stocks, options, fixed income, futures, ETFs, indexes, commodities, foreign exchange, convertibles, structured assets, volatility, real estate, distressed assets, cash, cryptocurrencies, weather, energy, inflation, global macro, infrastructure, and tax arbitrage. Some strategies are based on machine learning algorithms such as artificial neural networks, Bayes, and k-nearest neighbors. The book also includes source code for illustrating out-of-sample backtesting, around 2,000 bibliographic references, and more than 900 glossary, acronym and math definitions. The presentation is intended to be descriptive and pedagogical and of particular interest to finance practitioners, traders, researchers, academics, and business school and finance program students.
