Patricia Crone reassesses one of the most widely accepted dogmas in contemporary accounts of the beginnings of Islam: the supposition that Mecca was a trading center. In addition, she seeks to elucidate sources on which we should reconstruct our picture of the birth of the new religion in Arabia.

Patricia Crone's Collected Studies in Three Volumes brings together a number of her published, unpublished, and revised articles. the present volume pursues the reconstruction of the religious environment in which Islam arose and develops an intertextual approach to studying the Qur'anic religious milieu.

Patricia Crone's *God's Rule* is a fundamental reconstruction and analysis of Islamic political thought focusing on its intellectual development during the six centuries from the rise of Islam to the Mongol invasions. Based on a wide variety of primary sources -- including some not previously considered from the point of view of political thought -- this is the first book to examine the medieval Muslim answers to questions crucial to any Western understanding of Middle Eastern politics today, such as why states are necessary, what functions they are meant to fulfill, and whether or why they must be based on religious law. The character of Muslim political thought differs fundamentally from its counterpart in the West. The Christian West started with the conviction that truth (both cognitive and moral) and political power belonged to separate spheres. Ultimately, both power and truth originated with God, but they had distinct historical trajectories and regulated different aspects of life. The Muslims started with the opposite conviction: truth and power appeared at the same time in history and regulated the same aspects of life. In medieval Europe, the disagreement over the relationship between religious authority and political power took the form of a protracted controversy regarding the roles of church and state. In the medieval Middle East, religious authority and political power were embedded in a single, divinely sanctioned Islamic community -- a congregation and state made one. The disagreement, therefore, took the form of a protracted controversy over the nature and function of the leadership of Islam itself. Crone makes Islamic political thought accessible by relating it to the contexts in which it was formulated, analyzing it in terms familiar to today's reader, and, where possible, comparing it with medieval European and modern political thought. By examining the ideological point of departure for medieval Islamic political

thought, Crone provides an invaluable foundation for a better understanding of contemporary Middle Eastern politics and current world events.

Gibson believes that four times in ancient history the Arab people united and poured out of the deserts to conquer other nations. The first is described in the Qur'an as the people of 'Ad. Gibson identifies 'Ad with the Edomites and the Hyksos supported by various archaeological proofs. Years later Arabia united again under the Midianites. Some centuries later the Nabataeans unite Arabia. The Qur'an calls them the people of Thamud. In 600 AD the Arabian Peninsula was united under the flag of Islam. But there is more to this book than a study of the four times when the Arabs demonstrated their greatness. This book also examines the geographical references in the Qur'an cross-referencing them with historical locations. The surprise comes when Gibson examines the Holy City of Islam, known as Mecca. Here Gibson finds evidence that the original Holy City was in northern Arabia in the city of Petra. He theorizes that during an Islamic civil war the Ka'ba was destroyed and the Black Rock moved to its present location. Gibson examines archaeological, historical and literary evidence that support this theory. This book contains many references, as well as some useful appendices including a 32 page time line of Islamic history from 550 AD - 1095 AD, and a 20 page annotated selected bibliography of early Islamic sources in chronological order from 724 AD - 1100 AD plus a list of many early Qur'anic manuscripts. Easy to read, fully referenced with many illustrations and photos.

This study examines how religious authority was distributed in early Islam. It argues the case that, as in Shi'ism, it was concentrated in the head of state, rather than dispersed

among learned laymen as in Sunnism. Originally the caliph was both head of state and ultimate source of religious law; the Sunni pattern represents the outcome of a conflict between the caliph and early scholars who, as spokesmen of the community, assumed religious leadership for themselves. Many Islamicists have assumed the Shi'ite concept of the imamate to be a deviant development. In contrast, this book argues that it is an archaism preserving the concept of religious authority with which all Muslims began.

The rise of merchant capital in Mecca conditioned the development of Meccan social, economic, religious, and political structure. Mahmood Ibrahim traces the roots of capitalism from the emergence of merchants as the main force in Mecca through the first civil war in Islam (656–661). Through a rereading of original Arabic sources and drawing from modern scholarship on the subject, Ibrahim offers a new interpretation of the rise of Islam. He argues that Islam contributed certain institutional beliefs and practices that unblocked obstacles and helped merchants gain political and economic hegemony over western Asia. Ibrahim contends that, with the conquest of Mecca, the newly formed Muslim state spread its control to the rest of Arabia, which mobilized a significant social force and allowed for further expansion outside Arabia, thus extending merchant control to include new surplus-producing regions, a vast network of trade routes, and wider markets. This extensively researched study offers a new interpretation of the history of Islam, including the formation of Islamic society and the unfolding of the first civil war. In offering a better understanding of the Umayyad Caliphate that ruled Islam for a century to come, Ibrahim helps lay the groundwork for understanding the Middle East as it is today. Of interest to

scholars of Middle Eastern studies, this important work will be necessary reading for students of Near Eastern and North African history, as well as students of the history of Medieval Europe.

A 10th century Iraqi took to collecting verse graffiti left behind by travellers. The result of his pastime was a little book that conjures up his nostalgic mood in a manner rarely attempted in Arabic literature. This work offers a translation of his work and discusses its cultural context.

Long before Muhammed preached the religion of Islam, the inhabitants of his native Arabia had played an important role in world history as both merchants and warriors Arabia and the Arabs provides the only up-to-date, one-volume survey of the region and its peoples, from prehistory to the coming of Islam Using a wide range of sources - inscriptions, poetry, histories, and archaeological evidence - Robert Hoyland explores the main cultural areas of Arabia, from ancient Sheba in the south, to the deserts and oases of the north. He then examines the major themes of \*the economy \*society \*religion \*art, architecture and artefacts \*language and literature \*Arabhood and Arabisation The volume is illustrated with more than 50 photographs, drawings and maps.
