This adorable book featuring word-for-word narration looks just like Doc's Big Book of Boo-Boos, and is jam-packed full of Doc McStuffins fun including an original story featuring Doc and the gang!

"This textbook covers all the theory and technology sections that students need to learn in order to pass level 1, 2 and 3 automotive courses from the Institute of Motor Industry, City & Guilds and other exam boards. It has been produced in partnership with ATT Training and is a companion to their online learning resources. Learning is made more enjoyable and effective as the topics in the book are supported with online activities, video footage, assessments and further reading. If you are using ATT Training materials then this is the ideal textbook for your course"--

Who are we, and how do we relate to each other? Luciano Floridi, one of the leading figures in contemporary philosophy, argues that the explosive developments in Information and Communication Technologies (ICTs) is changing the answer to these fundamental human questions. As the boundaries between life online and offline break down, and we become seamlessly connected to each other and surrounded by smart, responsive objects, we are all becoming integrated into an "infosphere". Personas we adopt in social media, for example, feed into our 'real' lives so that we begin to live, as Floridi puts in, "onlife". Following those led by Copernicus, Darwin, and Freud, this metaphysical shift represents nothing less than a fourth revolution. "Onlife" defines more and more of our daily activity - the way we shop, work, learn, care for our health, entertain ourselves, conduct our relationships; the way we interact with the worlds of law, finance, and politics; even the way we conduct war. In every department of life, ICTs have become environmental forces which are creating and transforming our realities. How can we ensure that we shall reap their benefits? What are the implicit risks? Are our technologies going to enable and empower us, or constrain us? Floridi argues that we must expand our ecological and ethical approach to cover both natural and man-made realities, putting the 'e' in an environmentalism that can deal successfully with the new challenges posed by our digital technologies and information society.

The easy way for kids to get started with filmmaking If you've been bitten by the filmmaking bug—even if you don't have a background in video or access to fancy equipment—Digital Filmmaking For Kids makes it easy to get up and running with digital filmmaking! This fun and friendly guide walks you through a ton of cool projects that introduce you to all stages of filmmaking. Packed with full-color photos, easy-to-follow instruction, and simple examples, it shows you how to write a script, create a storyboard, pick a set, light a scene, master top-quality sound, frame and shoot, edit, add special effects, and share your finished product with friends or a global audience. Anyone can take a selfie or upload a silly video to YouTube—but it takes practice and skill to shoot professional-looking frames and make your own short film. Written by a film and video professional who has taught hundreds of students, this kid-accessible guide provides you with hands-on projects that make it fun to learn all aspects of video production, from planning to scripting to filming to editing. Plus, it includes access to videos that highlight and demonstrate skills covered in the book, making learning even easier and less intimidating to grasp. Create a film using the tools at hand Plan, script, light and shoot your video Edit and share your film Plan a video project from start to finish If you're a student aged 7–16 with an interest in creating and sharing your self-made video, this friendly guide lights the way for your start in digital filmmaking.

In this extraordinary adventure, an extra-ordinary newly-hatched chicken named Archibald Strutter is looking to find his place in the world while feeling insecure about his abilities, especially when compared to his talented siblings and classmates. His three brothers and one sister have each found their Big Thing (including a brother chicken who impressively grows human hair), while the only Big Thing

Archibald has planned is what he's eating for lunch. But everything changes for Archibald when he receives a mysterious blue card that reads, "Your Big Thing Is Here!" Accompanied by a friendly bee named Bee, Archibald heads out on a fantastic journey, where he encounters wondrous places and incredible people, all the while searching for something more, not realizing every moment he faces is it—Archibald's Next Big Thing. It's a story that reminds readers that, while looking for the next big thing isn't a bad thing, big and beautiful things are all around us—right now.
